

To hear the patients voice

Titia Lekkerkerk, Manager The Netherlands Patient Federation

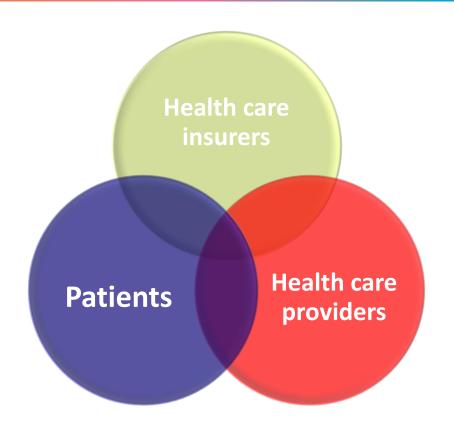

Brief insight in the Dutch Healthcare system

Three stakeholders in health care

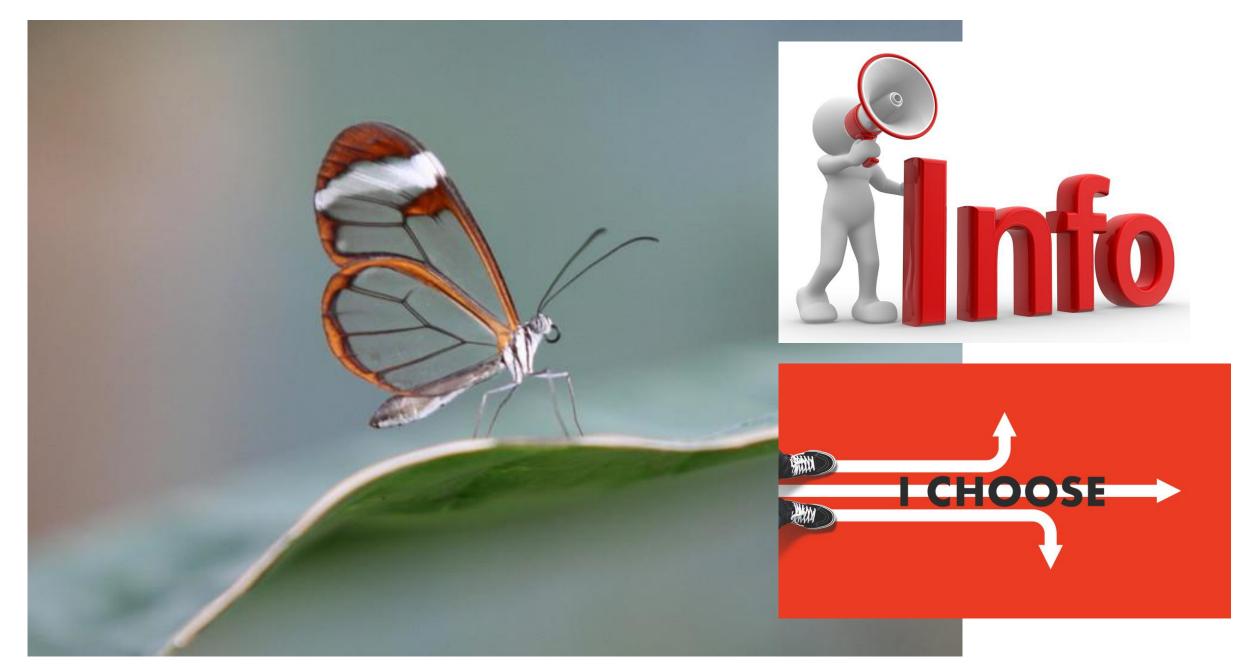

Health insurance; free but regulated

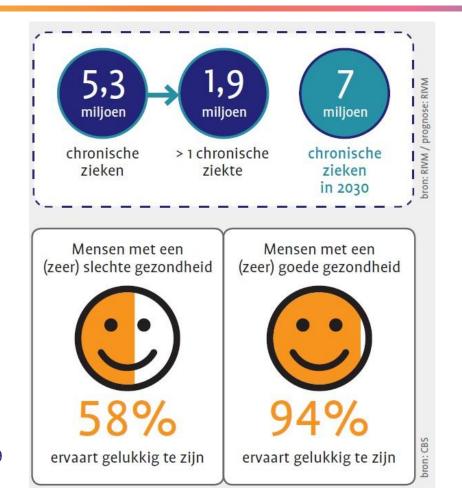

- Obligatory for people to have a health insurance.
- Obligatory for insurance companies to accept everyone.
- Insurance companies take control of the quality and the costs of healthorganisations by contracting.

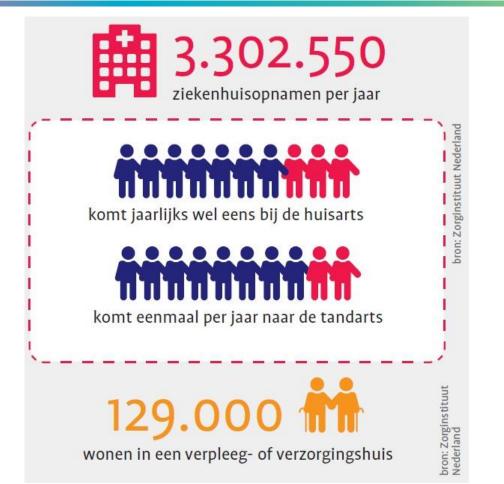

Some facts and figures

Dutch patient movement

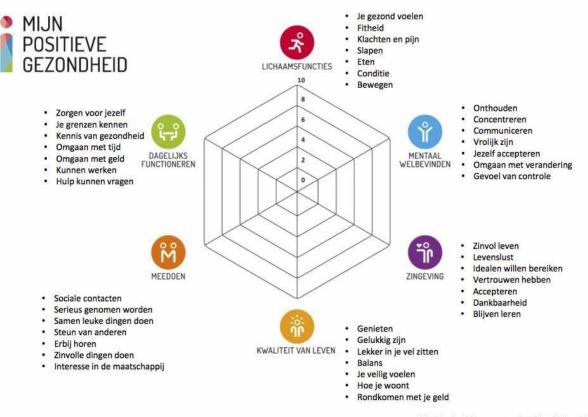

Netherlands Patient Federation

Positive health

"Health as the ability to adapt and self-manage, in light of the physical, emotional and social challenges of life".

www.iPositivehealth.com - versie 1.0 - oktober 2016 ©IPH

Value for people Trust

Control

"I can determine what happens to me and when."

"The person on the other side of the table knows what is going on."

Informed professionals

"I know better what my problems are and know that someone will take care of me."

"I am not bound to my house or hospital and specific moments, I can plan my own days and places to be."

Eroodom

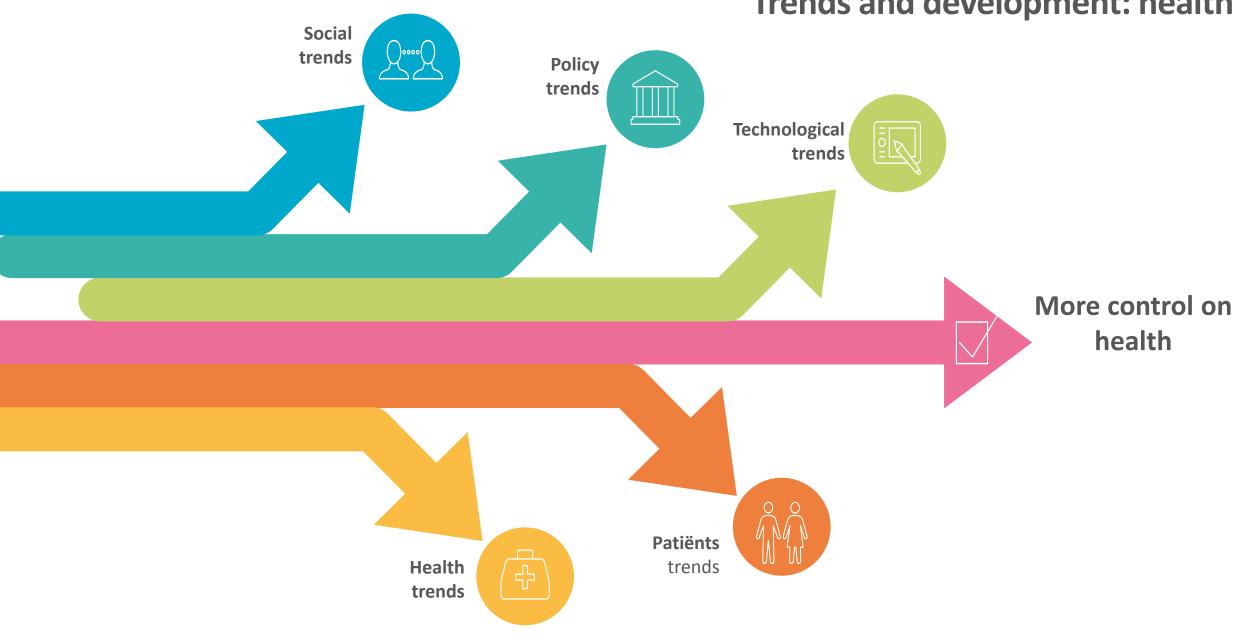

Insight

"I get insight in my health, how it develops and what I can do to improve."

> "I enjoy life: it is fun to work on a better health!"

Motivation & fun

Trends and development: health

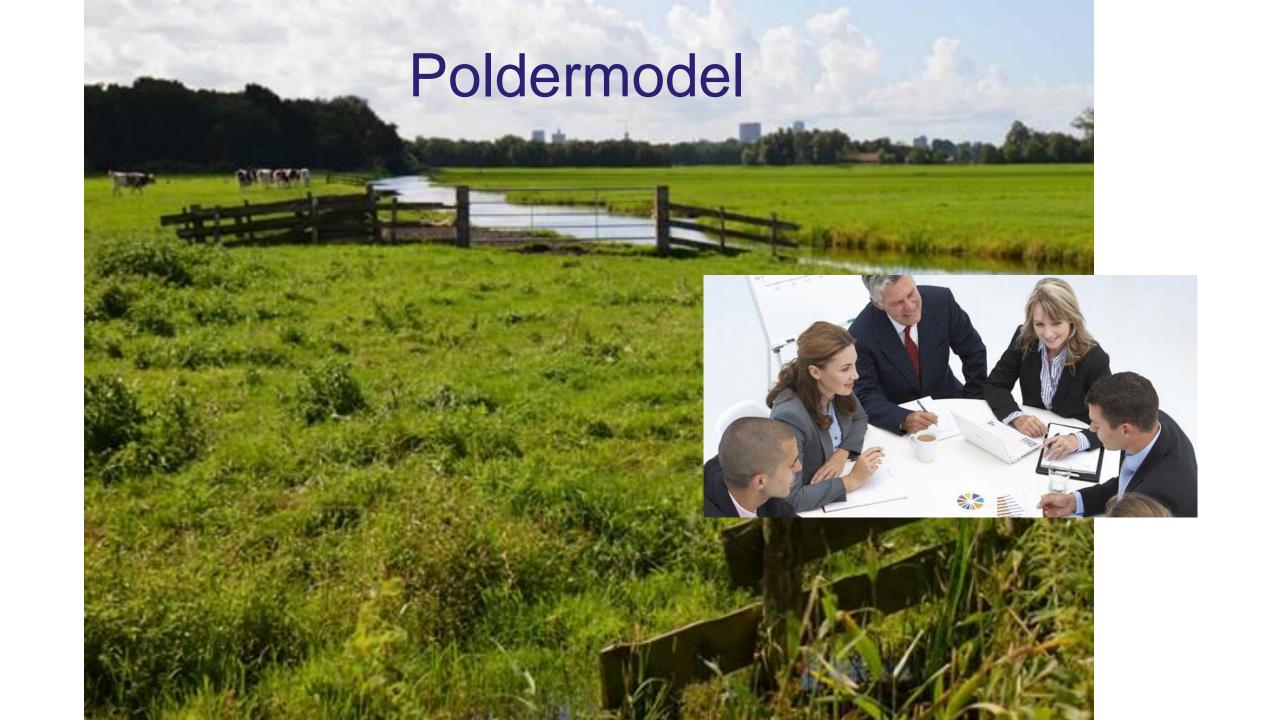

People, not patients!

Our five goals for the future. In 2030...

- 1.... it will be easy for me to live healthily
- 2.... all my health needs will be within easy reach
- 3.... healthcare will be aimed at improving my quality of life
- 4.... I will be able to live independently but will not be alone
- 5.... I will have access to the very best healthcare

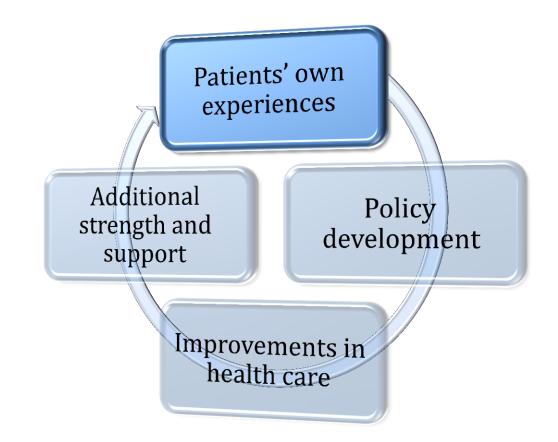

How do we work?

How?

- Online platforms: questionnaires and reviews
- Online Panel: 24.000 people, mainly patients.
- Focusgroup meetings
- Interviews
- Information and advise helpdesk

Involve patiënts en citizens

- 1. Information
- 2. Consultation
- 3. Advise
- 4. Co-production
- 5. Co-decision
- 6. Management: ownership and own initiative

PATIËNTENPARTICIPATIE

Change in the position of the patient

What are the topics we work on?

- ZorgkaartNederland

Patients about shared decision making

Bij de dokter?

3 goede vragen

Wat zijn mijn mogelijkheden?

> Wat zijn de voordelen en nadelen van die mogelijkheden?

Wat betekent dat in mijn situatie?

Voor meer informatie: www.3goedevragen.nl

Campaign. Help your dokter with a good talk

Verhalen

Tips

Professionals

Betere zorg begint met een goed gesprek

Je dokter wil jou graag goed helpen. Om jou goed te kunnen helpen heeft de dokter veel informatie van jou nodig! Welke klachten heb je? Wat vind jij belangrijk? Bedenk al vóór je afspraak wat je aan de dokter wilt vertellen. En wat je aan de dokter wilt vragen. Zo krijgen jullie een goed gesprek en kunnen jij en de dokter samen beslissen wat het beste is voor jou.

Op deze site lees je hoe je de dokter helpt om jou nog beter te helpen.

I have been thinking where my medical data are stored: 3 hospitals(8 dep.), 2 general practitioners, 4 paramedics, rehabilitation #EHR, #PHR @PatientFederation

MedMi

What do people want?

- 68% of Dutch people is interested in their medical data
- 59% of Dutch people would like a Personal Health record
- 83% would want the option to export medical data from professionals to their own Personal Health record
- 24% in panel research says information in PHR is wrong

Value of exchange of medical data in health

Care More human, less patient!

Data travel through health care

No borders or limitations

Safe and reliable

continuity of care

Health professionals do not work on an island: good cooperation needs good exchange

Inside and between institutions, passing borders of regions, and at home

The patient en his carer are

Quality of care

Care must be safe

Supporting good care by health standards and guidelines

Relevant information in case of emergency

Quality of life

Increasing control on health

Shared decision making

No unnecessary diagnostics

Independence

Rest and confidence
